

## **PSG Client installation**

### **Requirements:**

Operating system:

Windows XP, Vista, Windows 7

PSG client does not depend on specific hardware or software installation, except the operating system that should be MS. Windows.

There are two basic installation kits for PSG Client:

<http://psgsdk.com/downloads/psgclientcsharp.zip> - will install also .NET 4.0 framework if not found, used for applications build with Ms.Visual Studio .NET. ~ 80 MB

<http://psgsdk.com/downloads/psgclientvfp.zip> without .NET framework ~ 26 MB

For development and training you should download our SDK files for:

- C# ; <http://psgsdk.com/downloads/psgcsharp/sdk.zip>
- VFP ; <http://psgsdk.com/downloads/psgvfp/sdk.zip>

All is needed to start developing PSG applications should be found here excepting the PSG server manual and installation kits. You should also have a look to "DEMO Projects" servers according to your programming language.

Please check "docs" section of [psgsdk.com](http://psgsdk.com) and PSG manuals for additional information.
